

10 Charcoal and Sage Cat Hat

PetsCrochet | Photo-matched, adjustable prototype guide | US crochet terms

Important use note
This is a brief, supervised photo accessory. It is not a tested safety product and must not restrict sight, hearing, breathing or movement.

Visual direction	The cat version keeps the hat simple and leaves the face, whiskers and ears readable.
Stitch direction	Single crochet in rounds, chain-space ear openings, contrast single-crochet edging.
Why it works	The smooth charcoal crown and sage edge are visually clean, and the two ear openings make the construction easy to understand. The flat-lay reference also shows the holes and finished edge more clearly than a front portrait alone.
Variation	The flat-lay image can guide the color placement, but use the cat's measured ear spacing and head circumference rather than the photographed size.

Head and Ear-Spacing Worksheet

Measure	How to measure	Your number
H - head circumference	Around the head above the eyes and behind the ears.	_____ cm
E - ear center spacing	Center of one ear to center of the other.	_____ cm
O - opening width	Widest part of the ear plus only comfortable clearance.	_____ cm
D - front depth	Crown center to the edge that stays above the eyes.	_____ cm
s / r - gauge	Stitches and rows measured across a 10 cm swatch.	___ s / ___ r

Useful calculations: target crown diameter is approximately $H / 3.14$. Opening stitches are approximately $O \times s / 10$. Ear spacing stitches are approximately $E \times s / 10$. Round the numbers only after checking the placement on the real pet.

Materials

- Smooth washable charcoal cotton yarn
- Small amount of smooth sage cotton for the edge
- 3.0 to 3.5 mm hook, yarn needle, tape and stitch marker

Pattern note: Use the second uploaded cat portrait as the main article image. The alternate cat image with a visible bell is not the pattern reference; the bell belongs to the separate collar.

Construction

Charcoal and Sage Cat Hat | Work from your measured worksheet, not the photograph.

Step-by-step method

- 1 Measure the pet's head circumference (H), ear center spacing (E), widest ear width (O) and desired front depth (D). Record the actual numbers on the worksheet before choosing a size.
- 2 Make a 10 cm swatch in the main stitch. Record stitches per 10 cm (s) and rows per 10 cm (r). Use the swatch to calculate stitch counts instead of copying a generic breed size.
- 3 For a round crown, calculate the target crown diameter as $H / 3.14$. Begin with 6 single crochet in a magic ring and increase evenly until the crown reaches the measured diameter and sits above the eyes.
- 4 Work the body in the listed stitch until the hat reaches the ear line. Mark the center of each ear position using E and the opening width O. Keep the marks level on both sides.
- 5 At the opening round, work to the first marker, chain the number of stitches needed for O, skip the same number of stitches, continue to the second marker and repeat. On the next round, work into each chain space and reinforce both edges with compact single crochet.
- 6 Continue the body to the measured front depth D. Stop before the eye line. Add the listed edging or brim only after checking that the plain hat already fits comfortably.
- 7 Fasten off and weave every tail through several dense stitches. Stretch the fabric gently, inspect the openings and test the finished piece for loose loops before placing it on the pet.

Design-specific finish

Work a small dense single-crochet crown, form two measured ear openings and finish the forehead edge and openings with one sage round. Do not attach bells, ties, elastic or dangling decorations to the hat.

Variation: The flat-lay image can guide the color placement, but use the cat's measured ear spacing and head circumference rather than the photographed size.

Final Fit and Finish Check

- [] Both ears move naturally through the openings without compression.
- [] The front edge stays above the eyes during a normal head turn and downward look.
- [] The nose, mouth, whiskers, throat and breathing path are completely clear.
- [] All tails are woven in, the fabric has no loose loops and the edge cannot catch a claw.
- [] The pet remains relaxed. Remove the item at the first stress cue.
- [] The physical sample is washed, dried and checked again before reuse.

Design-specific safety note: Never replace a breakaway collar with a crochet hat or add a bell to the crochet. This item is for a short supervised photo only.

Before You Publish

Photographs can show a beautiful direction, but they cannot prove the stitch count, yarn content or fit. Crochet the sample, record the real yarn and gauge, wash it, and fit-check it on the intended pet before calling this design tested. Until then, keep the wording prototype-ready and inspiration-focused.

This guide is an original PetsCrochet photo-matched draft. It is not a veterinary, behavior or safety substitute.
