

# Cinnamon Stocking With a Removable Cotton Liner

Original pattern draft inspired by the supplied image. Gauge, yardage, dimensions and hanging capacity have not been physically tested. This is a decorative gift holder, not a wearable stocking or pet toy.

| Project                      | Written version                                                                 |
|------------------------------|---------------------------------------------------------------------------------|
| Skill                        | Adventurous beginner crochet plus basic sewing                                  |
| Body count / laid-flat width | 48 sts around / approximately 13.3 cm (5.2 in)                                  |
| Nominal height               | About 29 cm (11.4 in), excluding tab; final shape depends on gauge              |
| Yarn / starting hook         | Smooth cotton worsted-weight (#4) yarn; 4.0 mm to start; adjust to washed gauge |

## Materials

Allow approximately 230 m (252 yd) of cinnamon brown yarn. These are planning allowances, not measured consumption. Keep extra matching yarn for swatches and corrections.

Also: matching hook, removable stitch markers, yarn needle, scissors and tape measure. Use a fixed display hook appropriate to your surface. Remove all markers before display.

For the liner: prewashed woven cotton, approximately 50 x 60 cm, matching sewing thread, sewing needle or machine, paper and fabric scissors.

# 1. Measure and swatch

Target plain sc gauge: 18 sts and 20 rounds per 10 cm (about 4 in), after washing and drying as the yarn label directs. This is a design target, not a measurement taken from the photograph. Start with 4.0 mm to start; adjust to washed gauge. Use the smooth yarn and color combination listed on page 1.

Make a swatch tube: chain enough for at least a 24 cm circumference; join without twisting. Work at least 12 cm of joined sc rounds. Lay flat without stretching and measure a central 10 cm strip across one visible layer. Count rounds over 10 cm vertically. Swatch any special texture or colorwork separately. If the special-stitch tube differs in circumference, change hook for that section and recheck.

More stitches in 10 cm means a narrower stocking; fewer means a wider one. Use a larger hook for fewer stitches, a smaller hook for more, then wash and remeasure. Stop if the fabric is too open to hold the intended sealed packet or so rigid that the cuff cannot fold.

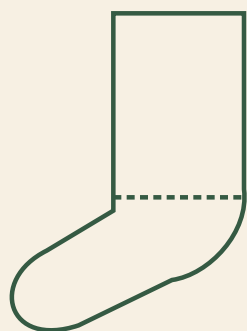

| Measure                        | This guide                                              |
|--------------------------------|---------------------------------------------------------|
| Toe to heel opening            | 14 cm, measured from closed toe along flattened foot    |
| Heel bridge to cuff attachment | 20 cm along the leg, before adding cuff                 |
| Visible cuff / edge            | 4 cm                                                    |
| Body opening                   | 48 stitches around; approximately 26.6 cm circumference |

For a different opening, measure the perimeter of your sealed packet plus about 2 cm of trial ease. With g = washed stitches per cm, choose  $N = 12 \times \text{ceiling}(\text{desired circumference} \times g / 12)$ . Use at least 36 stitches. Toe increases stop at N; the heel gap is N/2. Recalculate texture and colorwork repeats. This formula does not resize a motif chart automatically.

## US crochet terms

ch = chain; sc = single crochet; dc = double crochet; sl st = slip stitch; st(s) = stitch(es); rnd = round; BLO = back loop only; MC = main color; CC = contrast color. inc = 2 sc in one st. sc2tog = insert hook in next st, yarn over and pull up a loop; repeat in next st; yarn over and draw through all 3 loops.

Use joined rounds: ch 1 at the start and sl st into the first actual stitch at the end. Chains and joining sl sts never count as stitches. Work into the first actual stitch, not the joining sl st. Do not turn unless the textured-leg instruction says to turn. Mark the first stitch.

- |                     |                                          |
|---------------------|------------------------------------------|
| <b>1 TOE</b>        | Start closed; increase to body count.    |
| <b>2 FOOT</b>       | Work to the measured length.             |
| <b>3 HEEL GAP</b>   | Chain half; skip half. Leave it open.    |
| <b>4 LEG + CUFF</b> | Continue upward without closing the rim. |
| <b>5 HEEL + TAB</b> | Return to the gap; add and check tab.    |

Construction sketch only. Not a photograph or a scale template.

## 2. Toe, foot and heel opening

Start in cinnamon brown. Join every round as described on page 2. Use both loops for all toe increases. Keep a 15 cm tail to secure the ring later.

| Toe round | Instructions                                      | Count |
|-----------|---------------------------------------------------|-------|
| 1         | 6 sc into an adjustable ring; close ring securely | 6     |
| 2         | 2 sc in every st                                  | 12    |
| 3         | (sc in next 1 st, 2 sc in next st) 6 times        | 18    |
| 4         | (sc in next 2 sts, 2 sc in next st) 6 times       | 24    |
| 5         | (sc in next 3 sts, 2 sc in next st) 6 times       | 30    |
| 6         | (sc in next 4 sts, 2 sc in next st) 6 times       | 36    |
| 7         | (sc in next 5 sts, 2 sc in next st) 6 times       | 42    |
| 8         | (sc in next 6 sts, 2 sc in next st) 6 times       | 48    |

Continue the foot. After toe round 8, maintain exactly 48 sts in every round until the toe-to-opening length is 14 cm. Measure the flattened stocking from its closed toe to the current working edge. Follow the style schedule below; finish a full round. Do not add an increase round simply to gain length.

Work plain sc in both loops for the foot. For this version the toe, foot and heel remain cinnamon brown.

Reserve the heel. Ch 1, chain 24 loosely and skip the next 24 actual stitches. Sc in the remaining 24 stitches; join to the first chain of the bridge. The bridge replaces the skipped stitches. There are 48 positions around the new rim, but the skipped stitches below remain an open hole for the heel.

Leg foundation round (G1). Ch 1, sc once into the top of each of the 24 bridge chains and once into each of the other 24 sc; join (48 sc). Leave the underside of the chain free for the heel. Do not work into the skipped stitches yet.

## 3. Work the leg

Work sc in both loops around, maintaining 48 sc every round. Keep the join at the same point and do not turn.

Stop when the leg measures 20 cm from the heel bridge to the cuff attachment line. Use actual length, not an inferred row count from the image. Check the packet can pass through without forcing it. Fasten off, leaving the top open.

## 4. Work the heel into the opening

Use cinnamon brown and plain sc in both loops. H1: join at one end of the chain bridge. Work 24 sc into the unused undersides of the bridge chains and 24 sc into the skipped body stitches (48 sc total). Join. Do not add stitches at the corners; small corner gaps are closed with a yarn needle at finishing.

Put a marker at the start of each equal half of H1. Each decrease round uses this formula twice: sc2tog, sc in the next (current half-count minus 4) sts, sc2tog. This removes 4 stitches per round and keeps two equal halves. Move the markers to the first stitch of each new half. Ch 1 and join as usual; neither counts.

| Heel round | Repeat twice          | End count |
|------------|-----------------------|-----------|
| H2         | sc2tog, sc 20, sc2tog | 44        |
| H3         | sc2tog, sc 18, sc2tog | 40        |
| H4         | sc2tog, sc 16, sc2tog | 36        |
| H5         | sc2tog, sc 14, sc2tog | 32        |
| H6         | sc2tog, sc 12, sc2tog | 28        |
| H7         | sc2tog, sc 10, sc2tog | 24        |
| H8         | sc2tog, sc 8, sc2tog  | 20        |
| H9         | sc2tog, sc 6, sc2tog  | 16        |
| H10        | sc2tog, sc 4, sc2tog  | 12        |

At 12 stitches, fasten off leaving a 25 cm tail. Flatten the remaining opening into two sets of 6 stitches. Whipstitch each facing pair together through both loops. Close firmly without bunching the heel; weave in the tail. This original heel is a practical approximation of the photographed shaping.

## 5. Finish the cuff

Plain folded cuff. Join cinnamon brown at the rim. Ch 1, sc in each of the 48 sts; join. Repeat this plain round until the cuff measures 8 cm unfolded (approximately 16 rounds at the stated plain sc row gauge). Fold halfway outward for a cuff depth near 4 cm. The round count is a starting estimate; use the measured depth. Do not stitch across the opening.

## 6. Make and attach the tab

With cinnamon brown, ch 5. Row 1: sc in second chain and next 3 chains (4 sc). Ch 1 and turn. Repeat 4-sc rows until the strip measures 14 cm. Leave long sewing tails. Fold in half; overlap the ends by 2 cm on the inside back wall, just below the cuff fold. The exposed loop is approximately 5 cm. Sew through both tab ends and solid body fabric with a box and two diagonals. Do not attach only to the loose cuff edge.

## 7. Finish, inspect and use

Secure every end. Close the toe ring and weave its tail through several stitches, change direction and weave again. Secure the heel-corner gaps with small yarn-needle stitches without tightening the opening out of shape. Weave every color-change and joining tail on the inside. Trim only after the ends are secure; remove all markers and pins.

Check the actual packet. The stocking should hold the sealed packet without stretching the cuff, opening the stitches or pulling the heel out of shape. Choose the gift around the finished stocking, or resize and remake the stocking. No load rating or pet-proof claim is supplied.

Check the hanging tab. With pets excluded, support the stocking just above a soft surface and add only the intended packet. Look for elongated stitches, slipping joins or strain at the tab. Remove the packet at the first sign of movement or distortion. This household check is not certification for unattended or heavy loading.

Display and storage. Keep both empty and filled stockings inaccessible to pets. A high hook alone may not stop a climbing cat. Keep a filled stocking in a closed cabinet or room your pet cannot open; take it out only while you handle the gift. These are gift holders, not chew toys, wearable socks, feeders or enrichment toys.

Treat handling. Keep pet-appropriate treats in their own suitable sealed packaging. The owner removes and disposes of the wrapper before serving a normal portion. Never put loose food against the yarn or liner. Do not add stringy decorations, small removable parts, human holiday sweets or real bones.

## Care and troubleshooting

Follow the actual yarn label. Wash a sample before the full project; do not advertise machine washability without checking the yarn and all components. Dry fully, reshape the cuff and heel, then inspect the tab, seams and woven-in ends. Store empty and dry between seasons.

| Problem                | What to check                                                                              |
|------------------------|--------------------------------------------------------------------------------------------|
| Tube widens or narrows | Count only actual stitches; exclude turning chain and joining slip stitch.                 |
| Hole at heel corner    | Verify the H1 count first; close a small residual gap by sewing, not extra round stitches. |
| Texture pulls inward   | Swatch the texture separately; relax carried yarn or adjust hook for that section.         |
| Cuff rolls or flares   | Match its real circumference to the rim; do not force a short rib strip to fit.            |
| Packet catches inside  | Remove it; secure ends and carried strands. Consider the removable-liner version.          |

Design note: The liner is not food packaging and does not make the stocking chew-resistant. Keep treats in their own sealed packet.

## Removable cotton liner: sewing guide

Make the liner after the crochet shell has been washed, dried and measured. The supplied image shows two different textiles: one crochet shell and one woven liner. The liner reduces direct contact with the crochet; it is not a food-safe bag or a chew barrier.

1. Prepare the fabric. Prewash and dry the woven cotton using the intended care method. Press it flat. Remove all pins before fitting the liner near the finished stocking.
2. Draw the seam line. Lay the flattened shell on paper with the cuff folded into its final position. Trace its outside shape. Draw a second line approximately 5 mm inside the traced sides, heel and toe. This second line is the proposed liner seam line; test it in inexpensive fabric if the crochet is thick. Position the finished liner top about 5 mm below the open rim.
3. Add allowances. From the proposed seam line, add 10 mm outward around the sides, heel and toe for seam allowance. Add 20 mm above the finished top line for a double-fold hem. The cutting outline may extend beyond the shell outline; that is expected because it includes allowances.
4. Cut and sew. Cut two mirror-image fabric pieces. Put right sides together. Stitch along the seam line from one top side, around the heel and toe, to the other top side, leaving the top completely open. Backstitch the ends. Clip curved seam allowances carefully without cutting the seam; finish raw edges with a zigzag or overcast stitch.
5. Hem the top. Fold the top edge 10 mm to the wrong side, press, then fold another 10 mm. Stitch close to the inner folded edge all around without closing the opening. Turn the liner right side out.
6. Fit without hardware. Slide the empty liner into the stocking. It should sit inside without stretching the crochet, blocking the heel or protruding above the cuff. Adjust the seam if needed. Leave it removable with no ties, snaps, pins or buttons. Put only a suitable sealed packet inside.
7. Care separately. Remove the liner to clean it according to the fabric care instructions. Follow the yarn label for the crochet shell. Dry both completely before reassembling and inspect all seams and yarn ends.

Fit record: shell opening \_\_\_\_\_ cm; liner opening \_\_\_\_\_ cm; hem depth \_\_\_\_\_ cm; washed liner fitted \_\_\_\_\_. No standard paper template is included because the liner must match your actual shell.
