

Dog Face with Yarn Hair

A beige puppy face has brown ears, an embroidered smile and short yarn hair.

Version 1.0 | October 3, 2026 | Prototype-ready reading draft. No physical crochet sample, wash test or child/pet-use test was completed. Proposed corrections are editorial interpretations, not confirmed errata.

Starting specifications

Hook 2 mm; yarn specification not supplied. Listed at about 9 × 6 cm. Joined single-crochet rounds and embroidery. Consult the complete supply list and color plan in the pattern pages.

Flat face construction

US crochet, joined rounds. Starting chain does not count as a stitch. Head: MR six sc, then six increases per round to 12/18/24/30/36/42/48; close each round with sl st. Two ears: ch 9, skip hook chain; seven sc, three sc in last chain, six sc along underside = 16. Next rounds: seven sc, three increases, six sc = 19; inc, seven sc, four increases, six sc, inc = 25. Muzzle: MR eight sc, eight increases = 16.

Assembly and hair

Sew the two ears at the sides and muzzle low on the head; embroider eyes, black nose and smile as photographed. Cut seven strands about 13 cm, fold and attach at the top, then trim. For a lark's-head attachment, pass the folded loop through a top stitch, pull the two ends through it and snug gently; confirm the photo placement on a sample. The size 9 x 6 cm and 2 mm hook appear on the source cover. Yarn fiber/weight is not specified. Proposed start: smooth DK cotton with 2 mm hook; this is a sample choice, not a verified source specification. The reflowed instructions and all ten Word image assets follow without the clipped text boxes of the original layout.

Measure, finish and check

Gauge and dimensions

No verified PetsCrochet gauge is available. Where no gauge is stated, make a six-round sc circle ending at 36 stitches, measure its diameter without stretching and record yarn/hook. Check filled fabric for gaps; flat appliqués should lie flat without pulling. Measure stuffed height head-to-base, plus width/depth and widest circumference; record whether ears/halo are included. For patches, measure maximum width and height flat, without stretching. Source dimensions are estimates, not measurements of a new sample.

Resizing method

For a yarn/hook change, make matching test circles: new circle diameter divided by original circle diameter is an approximate scale ratio. Multiply known dimensions by this ratio as an estimate only. Keep the written stitch schedule until a physical prototype supports a changed schedule. Clothes and backings must fit the actual dog/motif; do not scale a wire frame, spring, eye size or garment fastening blindly. No yardage or fit is verified by this ratio.

Terms and supply checks

MR: magic ring; ch: chain; sc: US single crochet; inc: two sc in one base; dec/sc2tog: two sc joined into one; sl st/ss: slip stitch; hdc: half double crochet; dc: double crochet; tr: treble; dtr: double treble; FLO/BLO: front/back loop only; FO: fasten off. Ranges include both endpoints. Mark the first stitch, count base positions consumed and resulting stitches, and make pairs together. Yarn package size is not measured project use. Keep stitch marker, needle and scissors ready; use filling and components only where the chosen pattern calls for them.

Finish, care and intended use

Pin parts before sewing, test seated/standing balance without forcing it and inspect all seams and attachments. These are dog-themed display crafts for people, not pet chew toys or certified baby toys. Keep wire, spring parts, hard eyes, felt, hair strands and craft tools out of pets' reach. Follow actual yarn/filling/component care labels; assembled washability is untested. Clean gently only when the materials allow it, dry fully and inspect again. If a round cannot consume its available stitches, pause and clarify or sample the proposed interpretation. Record changes so the paired part follows the same plan.
