

Milky the Spotted Dog

Edition and sample status

Version 1.0 | October 12, 2026. Prototype-ready reading draft; this edition, its proposed corrections and new components have not been physically crocheted, washed or checked for recipient use. Complete supplied instruction, photograph and chart pages are included after the reading notes. The notes expand or clarify the reference; they do not establish tested errata.

Reference size and measurement

Reference height: 14-16 cm. No numerical gauge supplied. For a figure, measure height from crown to lowest foot in its display pose, then widest body width; for a head measure widest head width. For the pouch, measure laid-flat bag width and length separately from overall figure length. Measure only a completed relaxed sample, not a photo. These targets are reference values, not independent results.

Materials and starting hook

YarnArt Jeans in white 01, black 28 and brown 70; 2.5 mm hook; 8 mm eyes; add stuffing, marker, yarn needle and scissors. Yardage not supplied. Use a yarn needle suitable for the chosen yarn, a movable marker, scissors and measuring tape. Listed balls, skeins and gram amounts are reference allowances rather than measured consumption for this edition. Buy an additional allowance only after planning your own sample; no exact new total is promised.

Gauge and resizing

No numerical tested gauge is established for this reading edition. Where the reference has no stitch gauge, make a single crochet swatch larger than 10 cm square, let it rest, and record stitches and rounds in the middle 10 cm. Make a small stuffed component to check gaps. If stuffing shows through, trial a smaller hook and repeat. For a display figure rescale, $\text{ratio} = \text{desired finished height} / \text{measured original sample height}$. Trial yarn and hook together to produce approximately that scale while preserving the complete stitch schedule, then make the whole sample and remeasure. Check muzzle, ears, neck and base separately. Hardware and yardage do not scale automatically. This is a sampling method, not a verified second size. For the jar cover use the actual-container method in the written chart reading.

Terms and how to read the pages

US terms in the added notes: ch=chain; sc=single crochet; hdc=half double crochet; dc=double crochet; tr=treble; sl st=slip stitch; MR=magic ring; inc=2sc in one stitch; dec=sc2tog; BLO/FLO=back/front loop only. A decrease consumes 2 base stitches and produces 1. A three-stitch increase consumes 1 and produces 3. Move marker each spiral round; do not count an offset stitch as a new increase. Turning chains are not counted in added flat-row instructions. Follow each original pattern's own stated terminology and colour key. English, US terms.

Construction route

Track the colour changes and stitch counts together. It helps to mark each black section before starting the round, especially where an increase makes one white stitch and one black stitch. Milky has scattered black patches, mismatched ears and a large eye patch. The spots are worked into the head and body rather than all being sewn on afterwards. A plain collar keeps the patterned coat visible.

Count and completeness review

Ear round 6 must be (3 sc, inc) x3 to consume 12 and make 15; round 8 (4 sc, inc) x3 makes 18. Body round 17 written colour runs sum to 70, not 60; proposed final white run 7 becomes 0. Rounds 18-19 sum to 59; proposed last white run 6 becomes 7. Round 26 sum is 49; proposed final white38 becomes37. These colour-placement repairs need sampling. Proposed joining/face embroidery completion included.

Proposed joining and face completion

After body round32 at36 stitches, lightly stuff body and stitch its36-stitch neck edge to the36 free front loops left at head round27, keeping the face patch forward. Use a long needle and small stitches through corresponding loops; this is a proposed interpretation of the retained BLO round. Embroider nose and short mouth line in black below the eyes, following finished photo. Make tail in white, fasten with sewing tail, lightly stuff if desired, flatten opening and sew to rear at lower body. Close/sew collar ends around doll neck; its16cm reference length is not a real pet measurement. Recheck spot repairs and sample neck seam before calling this a finished edition.

Assembly and final checks

Follow the retained photographs and numbered assembly directions. Place paired ears and paws with temporary markers, compare front, side and rear, then sew securely around open edges or through flattened tops as directed. Do not force unmatched stitch counts into a seam: check the previous shaping round first. Add stuffing in small pieces while keeping any intended flat base flat. After sewing, remove every pin, secure tails and inspect every attached piece. Test any proposed seam or count repair on a sample before final gifting.

Care and intended use

These are dog-themed display and gift crafts, not chew toys or walking equipment for real pets. Keep stuffing, hard fittings, keys, joints, loose fibres and doll accessories away from pets. Follow the actual yarn and component labels for cleaning; trial care on a spare sample before washing the figure. Avoid heat on untested plastic fittings or glued components. No washability, attachment-strength or child-toy compliance test has been completed for this edition.

Sample record and troubleshooting

Record yarn brand/fibre and colour, hook, gauge, finished height/width, yarn used, proposed changes and care result. If fabric gaps appear, try a smaller hook and recheck size. If head droops, check stuffing distribution and seam positions; do not add concealed weights or wire absent from the design. For a distorted face, check marker positions and muzzle alignment before undoing the entire head. For the jar, remove the sleeve to clean the container; do not treat a crochet cover as protection against glass breakage. Read coloured stitch lines on the original PDF pages because plain-text extraction can lose colour segmentation.

Complete pattern pages

The full supplied pages begin next, including foundations, rows/rounds, stitch counts, colour cues, assembly photographs and charts available in the reference. Original page numbering restarts there. Use the count review above where a proposed alternative is given. For Milo, use the separate completion draft to supply the absent pieces; for the keychain, choose the marked alternative muzzle when sampling.
