Edition and sample status

Version 1.0 | October 12, 2026. Prototype-ready reading draft; this edition, its proposed corrections and new components have not been physically crocheted, washed or checked for recipient use. Complete supplied instruction, photograph and chart pages are included after the reading notes. The notes expand or clarify the reference; they do not establish tested errata.

Reference size and measurement

Reference height: about 5.5 inches / 14 cm. No numerical gauge; consistent tension specified. For a figure, measure height from crown to lowest foot in its display pose, then widest body width; for a head measure widest head width. For the pouch, measure laid-flat bag width and length separately from overall figure length. Measure only a completed relaxed sample, not a photo. These targets are reference values, not independent results.

Materials and starting hook

Worsted yarn: about 14 yd brown, 66 yd beige, 5 yd black, 5 yd red; 3.5 mm hook; stuffing, yarn needle and scissors. Reference fittings: 15 mm eyes and 21 mm nose. Amounts are stated usage, not independently measured here. Use a yarn needle suitable for the chosen yarn, a movable marker, scissors and measuring tape. Listed balls, skeins and gram amounts are reference allowances rather than measured consumption for this edition. Buy an additional allowance only after planning your own sample; no exact new total is promised.

Gauge and resizing

No numerical tested gauge is established for this reading edition. Where the reference has no stitch gauge, make a single crochet swatch larger than 10 cm square, let it rest, and record stitches and rounds in the middle 10 cm. Make a small stuffed component to check gaps. If stuffing shows through, trial a smaller hook and repeat. For a display figure rescale, $\text{ratio} = \text{desired finished height} / \text{measured original sample height}$. Trial yarn and hook together to produce approximately that scale while preserving the complete stitch schedule, then make the whole sample and remeasure. Check muzzle, ears, neck and base separately. Hardware and yardage do not scale automatically. This is a sampling method, not a verified second size. For the jar cover use the actual-container method in the written chart reading.

Terms and how to read the pages

US terms in the added notes: ch=chain; sc=single crochet; hdc=half double crochet; dc=double crochet; tr=treble; sl st=slip stitch; MR=magic ring; inc=2sc in one stitch; dec=sc2tog; BLO/FLO=back/front loop only. A decrease consumes 2 base stitches and produces 1. A three-stitch increase consumes 1 and produces 3. Move marker each spiral round; do not count an offset stitch as a new increase. Turning chains are not counted in added flat-row instructions. Follow each original pattern's own stated terminology and colour key. English, US terms.

Construction route

The muzzle is worked first and positioned before the head closes. The photo sequence shows how the cheeks, nose and ears come together, which is helpful if facial placement is the part you find hardest. Piper has a broad brown muzzle, rounded cheeks and tiny seated paws. The red-and-black bandana and matching bow add a dressed-up look. Those accessories belong to the crochet doll, which keeps this idea firmly in dog-lover gift territory.

Count and completeness review

The full and condensed ear instructions disagree on the round-1 total. The written sequence sums to 25; use 25 in rounds 1-2 and 34 after round 3, following the illustrated main instructions. The second bow row labelled 3 is row 4. All source pages retained.

Assembly and final checks

Follow the retained photographs and numbered assembly directions. Place paired ears and paws with temporary markers, compare front, side and rear, then sew securely around open edges or through flattened tops as directed. Do not force unmatched stitch counts into a seam: check the previous shaping round first. Add stuffing in small pieces while keeping any intended flat base flat. After sewing, remove every pin, secure tails and inspect every attached piece. Test any proposed seam or count repair on a sample before final gifting.

Care and intended use

These are dog-themed display and gift crafts, not chew toys or walking equipment for real pets. Keep stuffing, hard fittings, keys, joints, loose fibres and doll accessories away from pets. Follow the actual yarn and component labels for cleaning; trial care on a spare sample before washing the figure. Avoid heat on untested plastic fittings or glued components. No washability, attachment-strength or child-toy compliance test has been completed for this edition.

Sample record and troubleshooting

Record yarn brand/fibre and colour, hook, gauge, finished height/width, yarn used, proposed changes and care result. If fabric gaps appear, try a smaller hook and recheck size. If head droops, check stuffing distribution and seam positions; do not add concealed weights or wire absent from the design. For a distorted face, check marker positions and muzzle alignment before undoing the entire head. For the jar, remove the sleeve to clean the container; do not treat a crochet cover as protection against glass breakage. Read coloured stitch lines on the original PDF pages because plain-text extraction can lose colour segmentation.

Complete pattern pages

The full supplied pages begin next, including foundations, rows/rounds, stitch counts, colour cues, assembly photographs and charts available in the reference. Original page numbering restarts there. Use the count review above where a proposed alternative is given. For Milo, use the separate completion draft to supply the absent pieces; for the keychain, choose the marked alternative muzzle when sampling.

Piper The Pug

Crochet Pattern Designed By YarnSociety.com

The pattern is written in U.S. crochet terms, complete with clear instructions and pictures to help you along the way. Piper The Pug is crocheted in continuous spirals without joining the rounds. We suggest using a stitch marker or different color yarn to keep track of each round. Piper The Pug crocheted in worsted weight yarn is approximately 5.5 inches tall. Be aware that size may vary depending on the yarn and hook size used. Gauge is not particularly important, just be consistent with the tension you are using. And most importantly, have fun!

PIC #1 Attach the muzzle, starting at the bottom of Round 24 . Lightly stuff the muzzle as you go. (If you're not using a safety nose, attach the muzzle between Round 15-24. Lightly stuff the muzzle as you crochet and then embroider on the nose.)

PIC #2 Attach the body to the head at around Round 30-31.

PIC #3 Attach the front feet to the body at the neckline. (In line with the eyes)

PIC #4 Attach the back feet to the body between Round 5-7 - one on each side.

PIC #5 Attach the ears between round 5-6 of the head. Attach 2 stitches of the ear to the head.

PIC #6 Piper is coming together...

PIC#7 Attach the tail at the back of the body between Round 5-8.

Lastly, attach the bandana and/or the bow headband. Place the bandana around the neck and weave the piece of long yarn through a stitch at the other end. Make a knot or a bow and cut off the excess yarn.

Weave in all the excess pieces of yarn into the body. Please be aware that amigurumi contains small pieces and can be dangerous to children. If you're selling this stuffed ami, please place a warning and also state that safety eyes are not recommended for anyone under the age of 3.

Row 5: sc in the next 10 sts - chain 1, turn {10 sts}

Change to color **C**

Row 6: sc in the next 10 sts {10 sts}

Fasten off and weave in all ends.

Take a long piece of red yarn and weave it

vertically through the middle of the piece. Make a tight knot and wrap the rest of the yarn around the middle and make another knot.

Attach a long piece of yarn to the bow to wrap around the pugs head.

(I took 3 pieces of yarn and braided it)

Tail

Using color **B**

Rd 1: Adjustable Ring/Magic Circle with a base of 5 sc {5 sts}

Rd 2: (inc) 5 times {10 sts}

Rd 3: sc in the next 10 sts {10 sts}

Stuff the tail a bit.

Rd 4: (dec) 5 times {5 sts}

Fasten off and leave a long tail. Set aside until assembly.

Putting Piper The Pug Together - Assembly

-Attach the muzzle, starting at the bottom of Round 24. Lightly stuff the muzzle as you go.

-Attach the body to the head at around Round 30-31.

-Attach the front feet to the body at the neckline. (In line with the eyes)

-Attach the back feet to the body between Round 5-7 - one on each side.

-Attach the ears between round 5-6 of the head.

Attach 2 stitches of the ear to the head.

-Attach the tail at the back of the body between Round 5-8.

Lastly, attach the bandana and/or the bow headband.

Place the bandana around the neck and weave the piece of long yarn through a stitch at the other end.

Make a knot or a bow and cut off the excess yarn.

Please be aware that amigurumi contains small pieces and can be dangerous to children.
