

Plush Cat with a Bunny Option

A gray plush cat and white bunny share a body shape.

Version 1.0 | October 2, 2026 | Reading companion with every supplied pattern page. No physical crochet sample, wash test or child/pet-use test was completed. Proposed repairs are untested editorial interpretations, not designer-approved errata.

Starting specifications

Himalaya Dolphin Baby; 3.5 mm hook. No finished size stated. Crochet; shaping and face finishing. See the original supply list for component colors and amounts.

Shared cat/bunny construction

One cat entry with a bunny option. Listed Dolphin Baby yarn and 3.5 mm hook; one ball is a purchase unit, not measured use. Body grows 6/12/24/30, stays 30 then narrows 24/18/12 before head increases 24/30/36/42 and closes 36/30/24/18/12/6. Cat ears grow 6/9/11/13/13. Use the cat muzzle and ears, not the bunny parts, for the cat version.

Assembly ambiguity

Body round 16 mentions one arm join but omits the corresponding second join. A plausible reading is to attach the second arm at the matching four-stitch group, maintaining the total of 12. This is an untested interpretation; pin paired arms and confirm placement. Place eyes according to rounds 23-24 and the face photo. No finished measurement or gauge is stated. Record height and width after filling rather than promising a size from the photo.

Measure, finish and check

Gauge and resizing

Where no gauge is supplied, make a six-round circle of 36 sc using the selected yarn/hook and record its diameter without stretching. Fabric should contain the intended filling without visible gaps. For a yarn/hook change, measure matching test circles: $\text{new diameter} / \text{original diameter} = \text{approximate scale factor}$. Multiply listed dimensions by that ratio only as an estimate; stuffed shapes and clothes need a physical fit check. Keep the stitch schedule unchanged until a prototype establishes a different size. No yarn requirement, finished dimension or garment fit is verified by this formula.

Terminology and making checks

US terms unless the supplied page explicitly says otherwise. MR: magic ring; ch: chain; sc: single crochet; inc: two sc in one stitch; dec: join two stitches as one; sl st: slip stitch; hdc: half double crochet; dc: double crochet; tr: treble; BLO/FLO: back/front loop only; FO: fasten off. A body bobble counts as one position. For a proposed five-dc bobble, work five unfinished dc in one base and close all loops together; confirm the intended size against the source. Mark round starts, check consumed and resulting positions, make paired parts together and pin before sewing. Do not work an unresolved count as if it had been verified.

Materials, filling and care

Use the item-specific yarn/hook list on the preceding page and complete original materials list below. Include stitch marker, tapestry needle, scissors and the source filling/attachment materials. Ball sizes and planning allowances are not measured consumption. Fill gradually without distorting seams. Inspect closures, sewn parts, embroidered ends and sitting balance. Follow every actual yarn, filling and accessory care label; assembled washability has not been tested. Spot-clean only when the materials allow it, dry fully and inspect afterward.

Intended use and troubleshooting

These are cat-themed amigurumi/display crafts for people, not pet chew toys or certified baby toys. Keep wire, felt, plastic parts, loose strands and unfinished tools away from pets. If the shape buckles or paired parts differ, recount and compare the same round before adding filling. If a row cannot consume the available stitches, pause and resolve that row; the reference photo does not prove a corrected schedule. Record changes on the editable text so later paired parts use the same interpretation.

- 11) (2sc, dec)*5 (15)

Fold the ear in half and in half again. Knit together.

We tighten the eyes. We insert the needle into point 1, from 1 to 3, then immediately to 4, from point 4 we take the needle out at point 2, from 2 to 1, from 1 to 5, from 5 to 6 and out at point 2. Pull the thread well and fasten it . If necessary, repeat again. Fasten the thread.

Now we tighten the muzzle.

Without cutting the thread, insert the needle into point between the eye, tighten a thread. We fix it.

Repeat if necessary.

We embroider the nose and make another tightening (see photo). To tighten the nose from the back, we bring the needle into the corner of the nose, insert the needle into the opposite

corner of the nose and remove the needle from the back, moving a couple of columns up from the original point.

We embroider mustaches and eyebrows.

Sew on the ears.

And the kids are ready!
