Poki Black-and-Tan Puppy

A black-and-tan Poki puppy has a rounded body, upturned tail and small green heart.

Version 1.0 | October 3, 2026 | Prototype-ready reading draft. No physical crochet sample, wash test or child/pet-use test was completed. Proposed corrections are editorial interpretations, not confirmed errata.

Starting specifications

Chunky chenille; 5 mm main hook; finer green chenille and 3.5 mm hook for the heart. Listed at about 15 cm. Bobbles, color changes and sewn details. Consult the complete supply list and color plan in the pattern pages.

Construction and counts

Head/body grows 8/12/16/20/24/28/32/36/40/44/48, holds 48 through the brown bobble paws, then closes 40/32/24/16/8. Change to black after the first six brown rounds. Each paw bobble occupies one base position. Ears grow 6/9/12/15/18; tail grows 4/6/8/10/12 and holds 12. Place eyes at rounds 7-8 with eight sc between them as written.

Finishing and missing bobble definition

BO is named but linked to a video instead of defined. Proposed five-dc bobble: five unfinished dc in one base and close all six loops; it counts as one position. Sample before using. Attach folded, unfilled ears around rounds 12-13 and pin the filled tail before sewing. Use the 3.5 mm hook and finer green yarn for the optional heart; it is not a second dog design. The 15 cm size is approximate and dependent on yarn and tension.

Measure, finish and check

Gauge and dimensions

No verified PetsCrochet gauge is available. Where no gauge is stated, make a six-round sc circle ending at 36 stitches, measure its diameter without stretching and record yarn/hook. Check filled fabric for gaps; flat appliqués should lie flat without pulling. Measure stuffed height head-to-base, plus width/depth and widest circumference; record whether ears/halo are included. For patches, measure maximum width and height flat, without stretching. Source dimensions are estimates, not measurements of a new sample.

Resizing method

For a yarn/hook change, make matching test circles: new circle diameter divided by original circle diameter is an approximate scale ratio. Multiply known dimensions by this ratio as an estimate only. Keep the written stitch schedule until a physical prototype supports a changed schedule. Clothes and backings must fit the actual dog/motif; do not scale a wire frame, spring, eye size or garment fastening blindly. No yardage or fit is verified by this ratio.

Terms and supply checks

MR: magic ring; ch: chain; sc: US single crochet; inc: two sc in one base; dec/sc2tog: two sc joined into one; sl st/ss: slip stitch; hdc: half double crochet; dc: double crochet; tr: treble; dtr: double treble; FLO/BLO: front/back loop only; FO: fasten off. Ranges include both endpoints. Mark the first stitch, count base positions consumed and resulting stitches, and make pairs together. Yarn package size is not measured project use. Keep stitch marker, needle and scissors ready; use filling and components only where the chosen pattern calls for them.

Finish, care and intended use

Pin parts before sewing, test seated/standing balance without forcing it and inspect all seams and attachments. These are dog-themed display crafts for people, not pet chew toys or certified baby toys. Keep wire, spring parts, hard eyes, felt, hair strands and craft tools out of pets’ reach. Follow actual yarn/filling/component care labels; assembled washability is untested. Clean gently only when the materials allow it, dry fully and inspect again. If a round cannot consume its available stitches, pause and clarify or sample the proposed interpretation. Record changes so the paired part follows the same plan.

Crochet in continuous spirals without joining the rounds!

Put a marker (or use a scrap of contrasting yarn) at the beginning of each round.

The finished product using a 5 mm crochet hook is ~ 5,906 inches / 15 cm

- 3,5 mm crochet hook for the heart

- 2 safety eyes 20 mm / 0,787 inches
