

Puppy Crochet Medallion

A seated beige puppy with a blue collar sits on a dark crochet medallion with pale edging.

Version 1.0 | October 3, 2026 | Prototype-ready reading draft. No physical crochet sample, wash test or child/pet-use test was completed. Proposed corrections are editorial interpretations, not confirmed errata.

Starting specifications

Small amounts of worsted-weight yarn; 2.5 mm starting hook. Dog about $3\frac{1}{2} \times 3\frac{1}{2}$ inches; medallion about $4\frac{1}{2}$ inches across. Oval dog pieces, clusters and a decorative border. Consult the complete supply list and color plan in the pattern pages.

Oval puppy and backing

Head grows 8/14/22/30. Body round 1 totals 18 and round 2 consumes 18, producing 24. Body round 3 lists eight increases over 24, which produces 32, not printed 28; the following shaped legs/edge rely on an unclear available count. Resolve that row before final construction. Tail and separate legs use short chain shapes. Dog collar is a small appliqué detail, not equipment for a real pet.

Cluster clarification

Backing grows 6/12/18/24/32/42/42/56. Round 9 creates 28 clusters and skips alternate base stitches; edging is three stitches between each cluster, total 84. The special cluster definition calls its final loops five but its preceding steps do not clearly build that count. Proposed US three-hdc cluster: yarn over, insert in base, yarn over and pull up a loop; repeat twice more in the same base for seven loops, yarn over and draw through all seven, ch 2. Check the intended appearance on a sample. No physically tested correction is claimed. Keep both dog and backing flat before sewing.

Measure, finish and check

Gauge and dimensions

No verified PetsCrochet gauge is available. Where no gauge is stated, make a six-round sc circle ending at 36 stitches, measure its diameter without stretching and record yarn/hook. Check filled fabric for gaps; flat appliqués should lie flat without pulling. Measure stuffed height head-to-base, plus width/depth and widest circumference; record whether ears/halo are included. For patches, measure maximum width and height flat, without stretching. Source dimensions are estimates, not measurements of a new sample.

Resizing method

For a yarn/hook change, make matching test circles: new circle diameter divided by original circle diameter is an approximate scale ratio. Multiply known dimensions by this ratio as an estimate only. Keep the written stitch schedule until a physical prototype supports a changed schedule. Clothes and backings must fit the actual dog/motif; do not scale a wire frame, spring, eye size or garment fastening blindly. No yardage or fit is verified by this ratio.

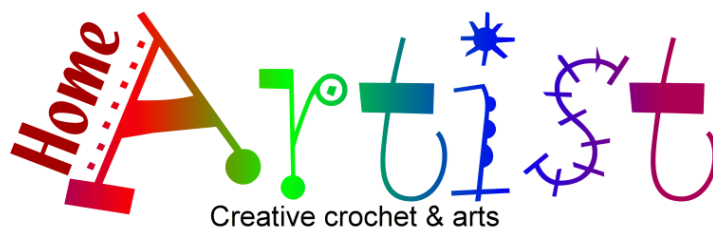

Terms and supply checks

MR: magic ring; ch: chain; sc: US single crochet; inc: two sc in one base; dec/sc2tog: two sc joined into one; sl st/ss: slip stitch; hdc: half double crochet; dc: double crochet; tr: treble; dtr: double treble; FLO/BLO: front/back loop only; FO: fasten off. Ranges include both endpoints. Mark the first stitch, count base positions consumed and resulting stitches, and make pairs together. Yarn package size is not measured project use. Keep stitch marker, needle and scissors ready; use filling and components only where the chosen pattern calls for them.

Finish, care and intended use

Pin parts before sewing, test seated/standing balance without forcing it and inspect all seams and attachments. These are dog-themed display crafts for people, not pet chew toys or certified baby toys. Keep wire, spring parts, hard eyes, felt, hair strands and craft tools out of pets' reach. Follow actual yarn/filling/component care labels; assembled washability is untested. Clean gently only when the materials allow it, dry fully and inspect again. If a round cannot consume its available stitches, pause and clarify or sample the proposed interpretation. Record changes so the paired part follows the same plan.
