

Rooster Chinese Zodiac Crochet Doll

Doll side and animal side of one design. Reference photos, not proof of physical testing.

Version and test status

Version 1.0 | October 5, 2026. Prototype-ready draft. No physical crochet sample, wash test, child-use test or pet-use test was completed. Repairs and colour interpretations below are proposed, not designer-confirmed errata. Original photographic/chart pages follow the complete reading instructions.

Size, yarn and hooks

The supplied collection states approximately 3 inches (7.6 cm) with 100% cotton at 250 m per 100 g. Finished height and width are not independently verified. Start with 2.2 mm for the head, body, limbs and details; 2.5 mm for the hood. Hooks are starting points. Measure overall height from the lowest foot to the highest ear, horn or costume feature, and measure maximum width. Record head circumference separately. No numerical gauge is supplied: make head rounds 1-7, measure the widest diameter and check that the stitches contain the filling; try the hood over the completed head before decorating. For an approximate rescale, new size / original sample size gives the linear scale factor. Change yarn and hook together, not individual stitch counts. Remake one full head/hood pair and measure it; accessory fit is not guaranteed by the ratio.

Materials and colour plan

Cotton yarn in orange, red, yellow, brown, black and beige. Head/limbs: beige; hood: orange; body: orange; fringe: brown. Small additional finishing colours are named with each part. One pair each of 8 mm and 6 mm eyes. Also use matching embroidery thread, polyester filling, stitch marker, yarn needle, scissors and pins removed before finishing. The reference uses glue for half-bead eyes and plastic noses and optional pink makeup powder for display shading. If substituting embroidery, prototype the face placement; this does not certify a child-safe toy. Yarn usage is not measured. For purchasing, obtain small quantities of each named colour and enough main colour to complete a sample; 250 m/100 g describes yarn density, not the amount consumed.

US terms and working method

MR = magic ring; ch = chain; sc = single crochet; hdc = half double crochet; dc = double crochet; sl st = slip stitch; inc = 2 sc into one base stitch; dec = join two base stitches into one sc; BLO = back loop only; FO = fasten off. Numbers in parentheses are resulting stitch counts. Work continuous spirals unless a row or edge explicitly says otherwise; mark the first stitch and move the marker each round. Chains used only for turning do not count unless stated. Work both loops except the Pig snout BLO round. Use invisible sc decreases if comfortable. Leave long sewing tails for pieces that will be attached.

Head - beige yarn, 2.2 mm hook

1	6 sc in a magic ring. (6)
2	Inc in all 6 stitches. (12)
3	(Sc, inc) 6 times. (18)
4	(Sc, inc, sc) 6 times. (24)
5	(3 sc, inc) 6 times. (30)
6	(2 sc, inc, 2 sc) 6 times. (36)
7	(5 sc, inc) 6 times. (42)
8-13	Sc in every stitch for 6 rounds. (42 each round)
14	(5 sc, dec) 6 times. (36)
15	(2 sc, dec, 2 sc) 6 times. (30)
16	(3 sc, dec) 6 times. (24)
17	(Sc, dec, sc) 6 times. (18). Stuff the head.
18	(Sc, dec) 6 times. (12)
19	Dec 6 times. (6). Close the remaining opening with the tail.

Add any eyes that require access before narrowing. For glued half-bead eyes, arrange them after assembly. Round 19 is the closing decrease round printed as R24 in the supplied base. Pull through the six remaining front loops and secure the tail inside.

Costume hood - orange yarn, 2.5 mm hook

1	6 sc in a magic ring. (6)
2	Inc in all 6 stitches. (12)
3	(Sc, inc) 6 times. (18)
4	(Sc, inc, sc) 6 times. (24)
5	(3 sc, inc) 6 times. (30)
6	(2 sc, inc, 2 sc) 6 times. (36)
7	(5 sc, inc) 6 times. (42)
8-14	Sc in every stitch for 7 rounds. (42 each round)
15	Sl st in all 42 stitches. Leave a long sewing tail. (42 slip stitches)

Keep the hood unstuffed. Its larger hook is intended to help it fit over the head. The doll face remains exposed at the opening; the animal face is placed on the opposite hood surface. Do not treat the hat as tested removable clothing. Test-fit before stitching it on.

Tiny body - orange yarn, 2.2 mm hook

1	8 sc in a magic ring. (8)
2	Inc in every stitch. (16)
3	(6 sc, dec) twice. (14)
4-5	Sc in every stitch for 2 rounds. (14 each round). Leave a long tail and lightly stuff.

Keep the 14-stitch neck edge open for sewing to the head. Filling should be contained without pushing the neck edge outward.

Legs - make 2 in beige

1	6 sc in MR. (6)
2	Sc around. (6)

Leave a tail. Keep them lightly shaped without bulky filling; sew the openings securely to the body.

Arms - make 2 in beige

1	5 sc in MR. (5)
2	Sc around. (5)

Leave tails; keep arms small and softly shaped.

Five-strand fringe - brown yarn, 2.2 mm hook

Ch 10 for the base, then ch 6 for the first strand. Sl st in the second strand chain and sc in the next 4 chains. Skip the nearest base chain and sl st in the next base chain. Repeat four times: sc in the next base chain, ch 6, sl st in the second new chain, sc in the next 4 new chains, sl st in the next base chain. This uses ten base chains across five strands. Leave a sewing tail. Pin the fringe around the exposed doll face, then sew its foundation to the head without burying the strand tips.

Comb in red

Only row	Ch 6 as a base, then ch 4 for the first point. Return: sc in second chain, hdc in next 2; sl st in next base chain. Sc in next base chain, ch 5; return sc in second chain, hdc in next 2, dc in last chain; sl st in next base chain. Sc in next base chain, ch 4; return sc in second chain, hdc in next 2; sl st in next base chain.
----------	---

Leave a tail. The nearest base chain is used first, then work towards the starting end. These five anchoring stitches use five of the six base chains; leave the starting chain unworked as the terminal tip. Do not invent a sixth anchoring stitch.

Beak in yellow

1	3 sc in MR. (3)
2	Inc 3 times. (6)
3	Sc around. (6)

Leave a tail; keep the small cone lightly shaped.

Wattle in red

Only row	Ch 4. Hdc in third chain, ch 2, sl st in that same chain. Ch 2, hdc in the remaining base chain, ch 2, sl st in that same chain.
----------	--

Leave a tail. This makes two small lobes.

Tail in black

Only row	Make MR. Three times: ch 7, sc in second chain and next 5 chains (6 sc), sl st into MR. Tighten MR after all 3 feathers.
----------	--

Leave a sewing tail.

Tail

Use the three-feather black tail above.

Animal costume assembly

Pin the red comb near hood rounds 7-8. Sew the beak onto the animal side and the wattle immediately below it. Sew the black tail to the back of the body. Place 6 mm animal eyes near hood rounds 11-12 about six stitches apart, and 8 mm doll eyes near head rounds 9-10 about four stitches apart. Complete common assembly.

Common doll assembly

Arrange the fringe on the skin-colour head and sew its foundation. Pin the hood so the doll face is exposed and the costume features point away from that opening. Pin the body centrally beneath the head, then attach its open neck edge with small, even stitches. Attach both legs near body rounds 1-2 and one arm on each side. Attach the tail on the animal side. Sew the hood around its opening without stretching it. Embroider doll eyebrows in brown near head rounds 8-9; position doll eyes as described for the animal. Add optional display cheek shading only after testing the product on spare yarn. Hide and secure all tails and remove every pin. Check both views before tying the final sewing knots. These common joining steps are repeated here because later animals in the supplied PDF refer back to the Rat base.

Count and construction notes

The assembly list omits the wattle although its pattern is supplied. This guide adds its proposed placement directly below the beak. The written comb has five anchors for six base chains; its terminal unworked-chain reading is proposed. The wattle chain anchors are spelled out; confirm their shape against the reference before sewing.

Fit and finishing checks

The hood should sit over the head without flattening its round shape. Check that the animal face and doll face are not crowded by seams. Compare paired ears/horns and limb positions before sewing. Match each count at the end of a shaping round; stop at a mismatch and trace consumed base stitches before adding another round. If a decorated piece buckles, unpick and redistribute its seam rather than forcing it flat. Resting upright is not verified; use a suitable display support if needed. Record actual size, yarn consumed and any adjustments when sampling.

Care and use

These miniature dolls are decorative display projects, not tested pet chew toys or certified infant toys. Keep glued parts, loose strands and any wire away from pets and young children. Inspect seams and fittings before handling, and retire damaged pieces from display. Follow yarn and component care instructions; there is no verified assembled wash method. Test cleaning on a spare piece first, avoid soaking glued components without manufacturer guidance and support the shape while drying. Cotton fibre alone does not establish washability of the finished doll.

Photographic and chart reference pages

The following unaltered pages retain the supplied construction charts, actual assembly photos and original wording. Rat base pages are included wherever the selected animal refers to them. Use the expanded instructions above for the proposed corrections; colour or count conflicts in the reference pages are not a second verified version.
