WiggleWoof Puppy Display Set

WiggleWoof sits on a spring above a green crochet ring with white bones in a dashboard scene.

Version 1.0 | October 3, 2026 | Prototype-ready reading draft. No physical crochet sample, wash test or child/pet-use test was completed. Proposed corrections are editorial interpretations, not confirmed errata.

Starting specifications

Fine velvet chenille; 2 mm hook; several colors for dog, ring and bones. Listed at about 15 cm for the finished project. Bobbles, a stuffed ring and decorative assembly. Consult the complete supply list and color plan in the pattern pages.

Set construction and counts

Doughnut: join ch 42 without twisting; 42/48/54/60/66, hold 66, then close 60/54/48/42. Match its two 42-position edges, fill gradually and sew them together. Dog: 8/12/16/20/24/28/30, hold 30 through paw bobbles, then 20/10. Ears 4/6/8; tail 6/9, holding 9. Make three chain-based bone shapes and sew them to the ring as written.

Spring and bobble notes

BO lacks a written stitch definition. A proposed five-dc bobble is five unfinished dc in one base stitch, then yarn over and close all six loops; count it as one body stitch and check its size on a sample. The adhesive spring is a separate 40 x 25 mm component. The photo does not establish heat resistance, adhesive life, road suitability or secure mounting. Use this as a decorative display and inspect its attachment. No vehicle-use claim or testing is made.

Measure, finish and check

Gauge and dimensions

No verified PetsCrochet gauge is available. Where no gauge is stated, make a six-round sc circle ending at 36 stitches, measure its diameter without stretching and record yarn/hook. Check filled fabric for gaps; flat appliqués should lie flat without pulling. Measure stuffed height head-to-base, plus width/depth and widest circumference; record whether ears/halo are included. For patches, measure maximum width and height flat, without stretching. Source dimensions are estimates, not measurements of a new sample.

Resizing method

For a yarn/hook change, make matching test circles: new circle diameter divided by original circle diameter is an approximate scale ratio. Multiply known dimensions by this ratio as an estimate only. Keep the written stitch schedule until a physical prototype supports a changed schedule. Clothes and backings must fit the actual dog/motif; do not scale a wire frame, spring, eye size or garment fastening blindly. No yardage or fit is verified by this ratio.

Terms and supply checks

MR: magic ring; ch: chain; sc: US single crochet; inc: two sc in one base; dec/sc2tog: two sc joined into one; sl st/ss: slip stitch; hdc: half double crochet; dc: double crochet; tr: treble; dtr: double treble; FLO/BLO: front/back loop only; FO: fasten off. Ranges include both endpoints. Mark the first stitch, count base positions consumed and resulting stitches, and make pairs together. Yarn package size is not measured project use. Keep stitch marker, needle and scissors ready; use filling and components only where the chosen pattern calls for them.

Finish, care and intended use

Pin parts before sewing, test seated/standing balance without forcing it and inspect all seams and attachments. These are dog-themed display crafts for people, not pet chew toys or certified baby toys. Keep wire, spring parts, hard eyes, felt, hair strands and craft tools out of pets’ reach. Follow actual yarn/filling/component care labels; assembled washability is untested. Clean gently only when the materials allow it, dry fully and inspect again. If a round cannot consume its available stitches, pause and clarify or sample the proposed interpretation. Record changes so the paired part follows the same plan.
